

JAFRIB

ATI'S JAFRIB is a synthetic, single-jacket hose with a nitrile/PVC rubber lining and cover. JAFRIB is made in a single extrusion, eliminating the risks of jacket separation. The outside jacket offers superior resistance to acids, alkalis, oils, gasoline and ozone. JAFRIB is available in red and yellow, in lengths of 50' and 100' and can be coupled with NST, NPSH, Storz or other, special order couplings. Shorter lengths are available by special order.
