

JAFX4

ATI'S JAFX4 is the industry's only four layer hose. It is made of high tenacity synthetic yarn circular woven and completely enveloped in a tough, highly resistant synthetic rubber. The hose is produced in a "co-extrusion" process, without the use of glues or adhesives, creating a homogenous hose which cannot delaminate. JAFX4 is available in yellow, in lengths of 50' and 100' and can be coupled with NST, NPSH, Storz or other, special order couplings. Shorter lengths are available by special order
